

# Natural Gas is Available at Historically Low Prices. Stay Out of Rough Water with Reliable Choice Energy.

## WHY PARTICIPATE?

The price your utility charges for natural gas fluctuates with the market. Gas Customer Choice programs give you the ability to eliminate that risk by securing a fixed price for natural gas supply.

**Bottom Line: Price Certainty = Budget Certainty**

## WHY NOW?

Natural gas prices have recently fallen to historically low levels. At the same time, utilities have filed for approval of the base prices they expect to charge for natural gas. Currently available prices are lower than those requested by the utility.

**Bottom Line: Savings vs Filed Utility Prices**

## WHAT CHANGES?

Your price for natural gas will be fixed at a competitive rate. You will be protected from fluctuating prices charged by your utility. Aside from this, your bill will look exactly as it does now.

**Bottom Line: Safe Harbor from Volatility**

## WHAT DOESN'T CHANGE?

Your current natural gas utility will continue to deliver the gas, read your meter, bill you, and handle gas line emergencies as they do now. Your natural gas utility will also continue to charge you for these services as they do now at regulated rates. When you receive your bill, you will pay your current natural gas utility and the utility, in turn, will pay your supplier of gas.

**Bottom Line: Simple and Seamless**

## WHY RELIABLE CHOICE ENERGY?

Professionals at Reliable Choice Energy have been procuring natural gas for the area's largest commercial and industrial accounts for many years. By expanding our service to include Customer Choice accounts, we are bringing the benefits of that purchasing power directly to you. Not all Customer Choice offerings are the same. Our industry experts will negotiate on your behalf to secure better rates, terms, and conditions.

**Bottom Line: Bigger is Better**
